

# 7.5 Parent Functions

## Warm-Up Friday

Write the equations of as many parent functions as you can remember. Then write your name on & turn in your warm-ups!

## About Me

1. Would you rather be the smartest person or the most attractive person?
2. Would you rather be a doctor or a lawyer?

Concavity: *curved line*

Symmetry:

- Rotational
  - across y-axis
- 

Increasing/Decreasing:

"positive slope"

up

"negative slope"

down

Parent Functions:

Linear  
 $y = x$ Constant  
 $y = b$ Exponential  
 $y = a^x$  ex.  $y = 2^x$ Quadratic  
 $y = x^2$ Square Root  
 $y = \sqrt{x}$ Logarithmic  
 $y = \log_a x$ Cubic  
 $y = x^3$ Cube Root  
 $y = \sqrt[3]{x}$ Absolute Value  
 $y = |x|$ 

Sine

$$y = \sin x$$

Cosine

$$y = \cos x$$

Rational (Fraction)

$$y = \frac{1}{x}$$

Transformations:

$$f(-x)$$

Reflects  
over y-axis

$$-f(x)$$

Reflects  
over x-axis

$$f(x) + a$$

(outside)

UP or DOWN

$$f(x - a)$$

(inside)

LEFT or RIGHT  
+  
-

$$2f(x)$$

$$\frac{1}{2}f(x)$$

$$f(2x)$$

$$f(\frac{1}{2}x)$$

Stretch/  
compression

**Practice – Parent Functions**

pp 67,69

Name \_\_\_\_\_ Date \_\_\_\_\_ Period \_\_\_\_\_

**Plot the points and decide which Parent Function best fits the given table of values.**

1. The data in the table below shows the height of a ball being thrown. Plot the points and determine the name and the equation of the parent function that best represents the data.

time	height
0	3
1	5.1
3	6.9
4	6.6
7	.9

Parent Function Name:

Parent Function Equation:

2.

x	y
-1	7
1	5
3	3
4	4
6	6

Parent Function Name:

Parent Function Equation:

3.

x	y
-3	1
-2	2
1	3
6	4

Parent Function Name:

Parent Function Equation:

**List all Parent Functions that meet the following criteria:**

4. Increasing on the interval  $(0, \infty)$ : \_\_\_\_\_
5. Range is  $(-\infty, \infty)$ : \_\_\_\_\_
6. Has rotational symmetry: \_\_\_\_\_
7. Is symmetrical about the line  $x = 0$ : *y-axis* \_\_\_\_\_
8. Has no concavity: \_\_\_\_\_

9. The Constant Parent Function is given by the equation  $y = c$ , where  $c$  is any real number. Complete the following table of information for this parent function. *\*Hint: pick a value of  $c$  to help you.\**

Name	
Equation	
Domain	Range
Increasing	Decreasing
as $x \rightarrow \infty, f(x) \rightarrow$	as $x \rightarrow -\infty, f(x) \rightarrow$
Concavity	Symmetry

Critical Points	
$x$	$y$

- 9b. Is  $x = c$  a function? Why or why not?

**Determine the Parent Function of each graph and describe the changes that were made to the Parent Function to create the new graph.**

10.

Parent Function: \_\_\_\_\_

Changes: \_\_\_\_\_

\_\_\_\_\_

11.

Parent Function: \_\_\_\_\_

Changes: \_\_\_\_\_

\_\_\_\_\_

Equation: \_\_\_\_\_

12. Compare and contrast the Linear Parent Function and the Cube Root Parent Function.

Similarities: \_\_\_\_\_

Differences: \_\_\_\_\_
