

SYSTEMS OF INEQUALITIES

Agenda

Warm-Up

Notes

- Systems of Inequalities

Homework

- Practice (1 page)

Objective:

You will find possible solutions to a system of inequalities.

Warm-Up

Chris wants to order DVDs over the internet. Each DVD costs \$15.99 and shipping for the order costs \$9.99. Chris has no more than \$100 to spend.

1. Write an inequality that represents Chris' situation.

$$15.99x + 9.99 \leq 100$$

2. How many DVDs can Chris order without exceeding his \$100 limit? Justify your answer mathematically.

p. 87

To graph a line you need a slope and a y-intercept

$$y = mx + b$$

$$\geq, \leq$$

I. Graph the linear inequalities

$$y \geq -x + 1$$

and

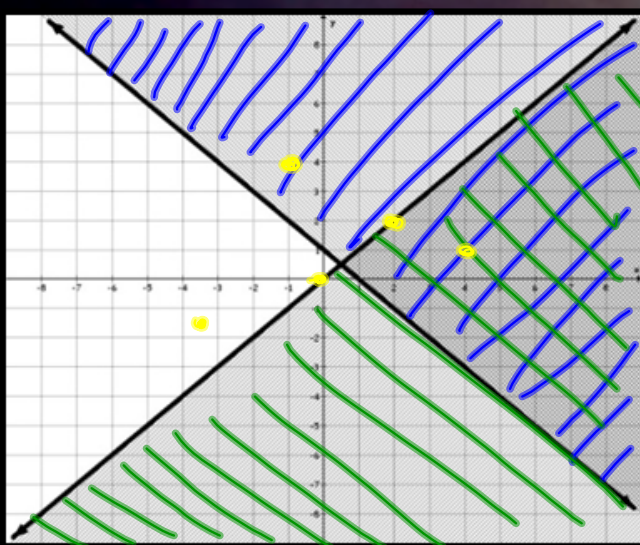

$$y \leq x$$

SOLID/UP **SOLID/DOWN**

$$m = -\frac{1}{1}, b = 1 \quad m = 1, b = 0$$

State which points are solutions to the system of inequalities graphed below.

5. Solve each by graphing, then name one point that lies in the solution area.

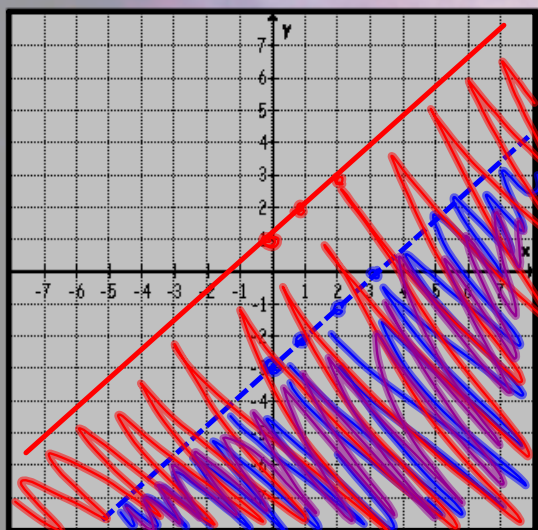

$$y < 3$$

$$8x + 4y > 12$$

7. Solve each by graphing, then name one point that lies in the solution area.

$$y = mx + b$$

SOLVE FOR y .

$$2x - 2y > 6$$

$$y - x \leq 1$$

$$\begin{array}{r} 2x - 2y > 6 \\ -2x \quad -2x \end{array}$$

$$\frac{-2y}{-2} > \frac{-2x + 6}{-2}$$
