

Step 1: All 4 papers need the their titles facing up

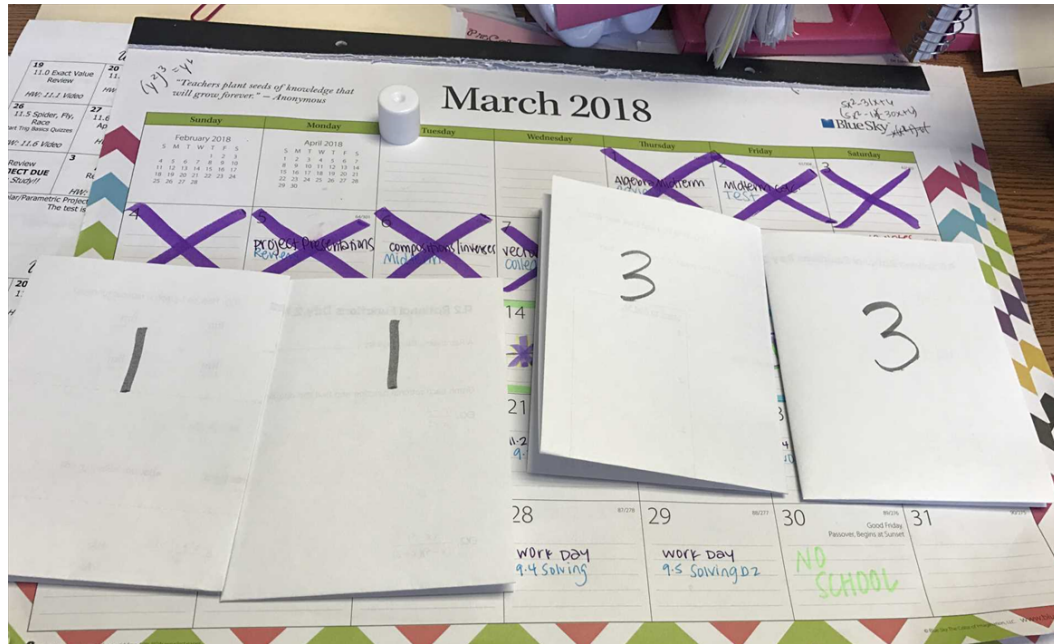

Step 2: Fold all the papers up (hamburger) so they look like this!

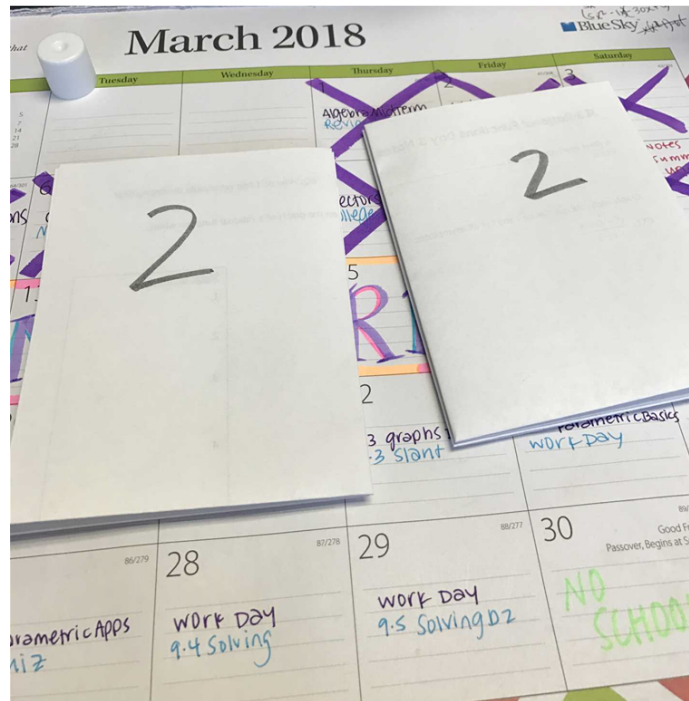

Step 3: Fold all the half papers in half again! So now they are little rectangles.

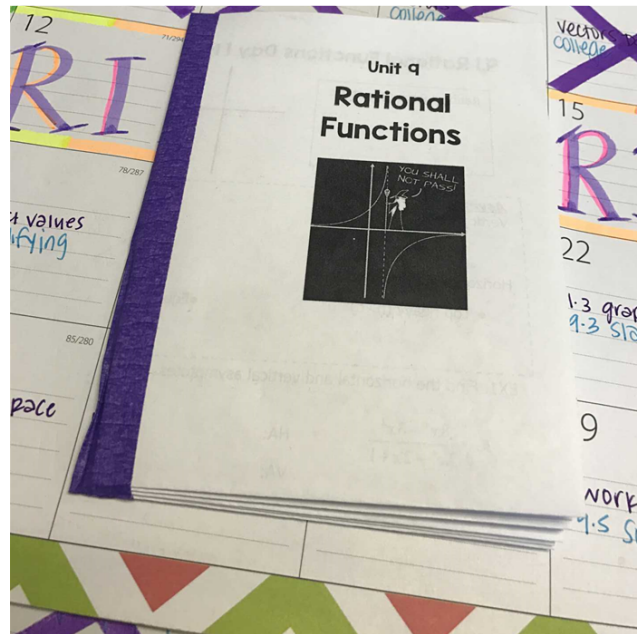

Step 4: Glue the 1's and 3's together. Make sure the folds are together.

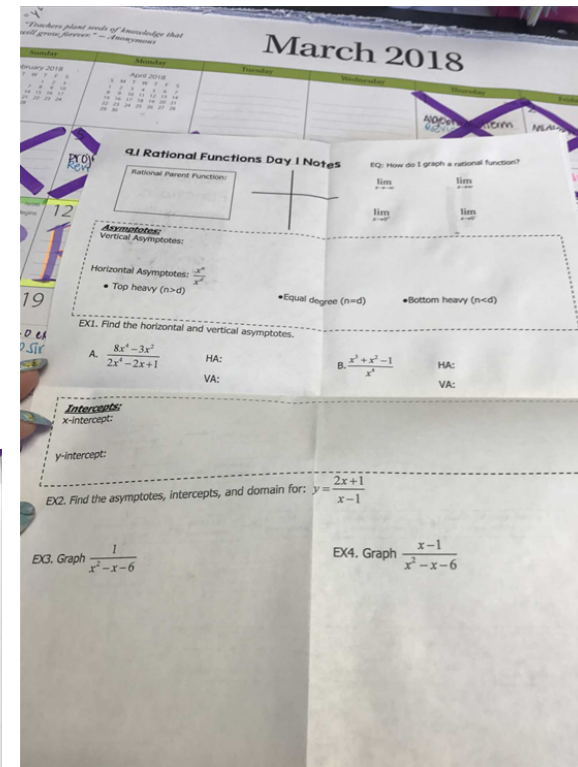

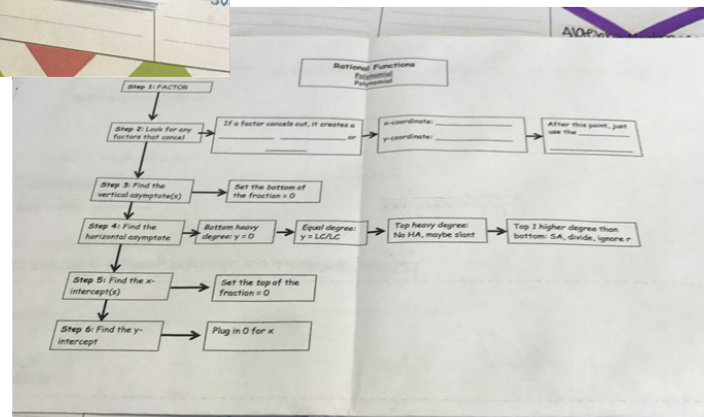

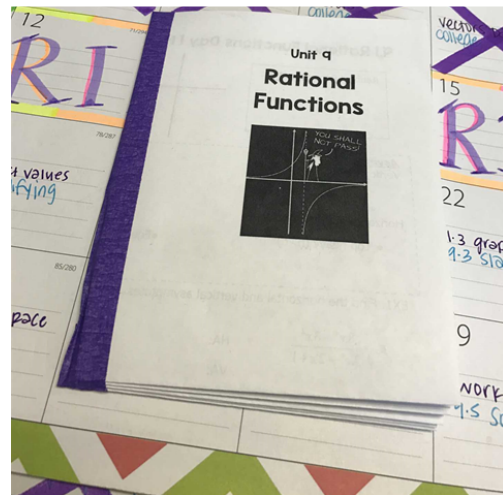

Step 5: Now glue the 2's together. Again, keep the folds on the same side.

Step 6: Last thing! Reinforce the spine by using masking tape & folding it over.

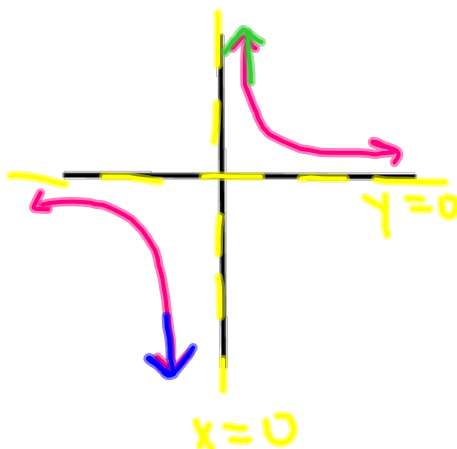

These are your notes for the entire unit! Write your name on it and keep it safe!!!

9.1 Rational Functions Day 1

EQ: How do I graph a rational function?

Rational Parent Function:

$$y = \frac{1}{x}$$

end behavior HA

$$\lim_{x \rightarrow -\infty} 0 \quad \lim_{x \rightarrow \infty} 0$$

$$\lim_{x \rightarrow 0^+} \infty$$

Right

$$\lim_{x \rightarrow 0^-} -\infty$$

Left

9.1 Rational Functions Day 1

EQ: How do I graph a rational function?

Asymptotes:

Vertical Asymptotes: to find, set bottom equal to 0 $x = \underline{\hspace{2cm}}$
 can NEVER cross a V.A.

Horizontal Asymptotes: $\frac{x^n}{x^d}$ tells end behavior (can cross)

• Top heavy ($n > d$)

high
low \rightarrow no

• Equal degree ($n = d$)

same
same \rightarrow name
 $y = \frac{LC}{LC}$

• Bottom heavy ($n < d$)

low
high $0 = y$

EX1. Find the horizontal and vertical asymptotes.

A. $\frac{8x^4 - 3x^2}{2x^4 - 2x + 1}$

HA: $y = \frac{8}{2}$ $\boxed{y = 4}$
 VA: none

same
same name

$2x^4 - 2x + 1 = 0$
 can't factor

B. $\frac{x^0 + x^2 - 1}{x^4}$

HA: $y = 0$
 VA: $x = 0$

low
high

$\sqrt[4]{x^4} = \sqrt[4]{0}$
 $x = 0$

9.1 Rational Functions Day 1

EQ: How do I graph a rational function?

Intercepts:

x-intercept:

zero
root

set top = 0 (#, 0)

y-intercept:

plug in x=0 (0, #)

EX2. Find the asymptotes, intercepts, and domain for: $y = \frac{2x+1}{x-1}$

HA: same name

VA: $x-1=0$
 $x=1$

$$\begin{aligned} \text{x-int } 2x+1 &= 0 \\ -1 &= -1 \\ \frac{2x}{2} &= \frac{-1}{2} \end{aligned}$$

$$\begin{aligned} \text{y-int } \frac{2(0)+1}{0-1} \\ \frac{1}{-1} \end{aligned}$$

$$\text{HA: } y = 2/1$$

$$\text{VA: } x = 1$$

$$\text{x-int: } (-1/2, 0)$$

$$\text{y-int: } (0, -1)$$

$$\begin{aligned} \text{domain: bottom} &= 0 \\ (-\infty, 1) &\cup (1, \infty) \end{aligned}$$

9.1 Rational Functions Day 1

EQ: How do I graph a rational function?

EX3. Graph $\frac{1}{x^2 - x - 6}$

FACTOR
FIRST

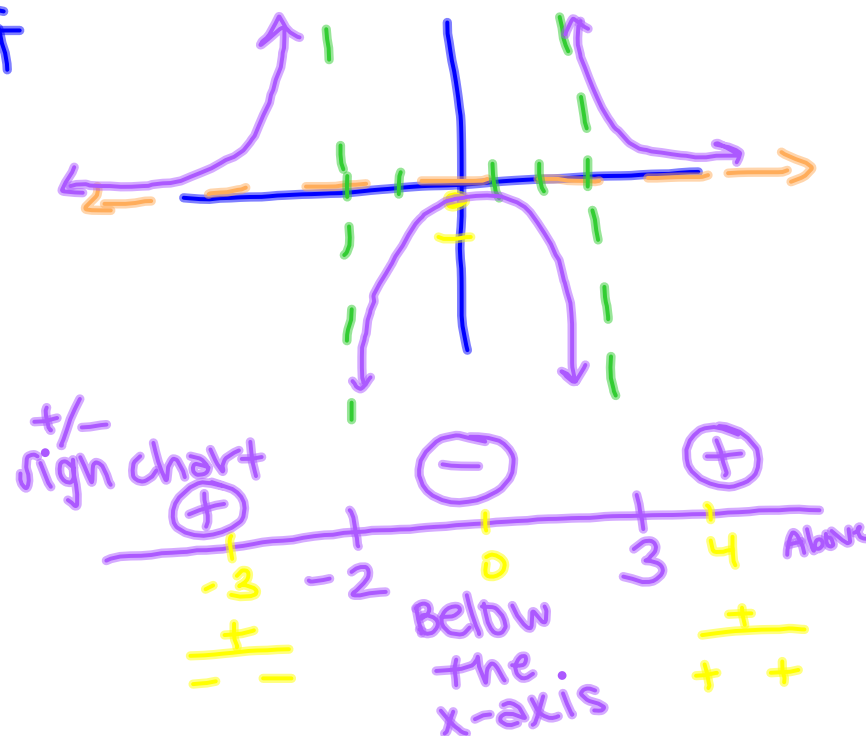

$$\frac{1}{(x-3)(x+2)}$$

HA: $\frac{0}{2}$ low high $y=0$

VA: $x-3=0$ $x+2=0$
 $x=3$ $x=-2$

x-int: $1 \neq 0$ none

y-int: $\frac{1}{-6}$ $(0, -1/6)$

9.1 Rational Functions Day 1

EQ: How do I graph a rational function?

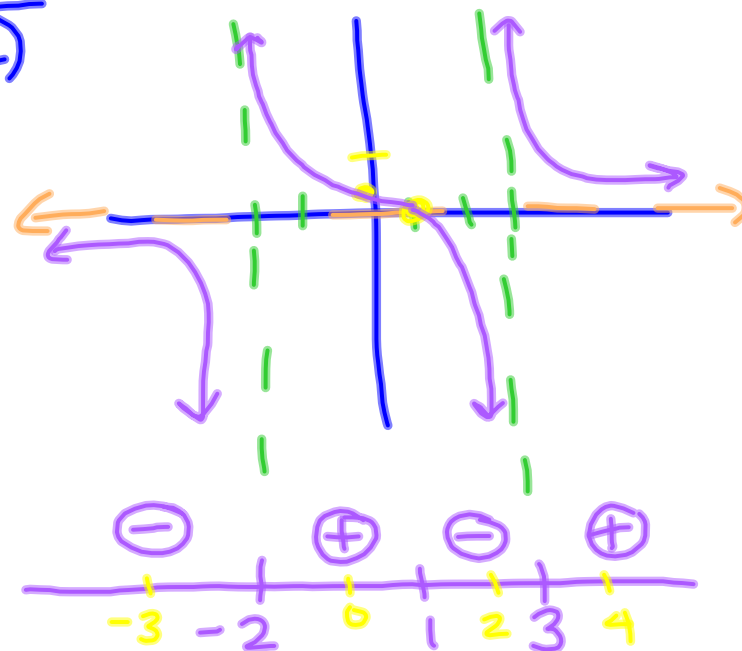

EX4. Graph $\frac{x^2-1}{x^2-x-6} = \frac{x-1}{(x-3)(x+2)}$

HA: $\frac{\text{low}}{\text{high}} = 0 = y$

VA: $x=3$ $x=-2$

x-int: $x-1=0$
 $x=1$ $(1,0)$

y-int: $(0, -\frac{1}{6})$

9.1 Graphing Rational Functions Day 1

Name _____

For #1-9, find the domain and any vertical or horizontal asymptotes.

1. $f(x) = \frac{3}{x-5}$

2. $f(x) = \frac{2}{x^2}$

3. $f(x) = \frac{1}{x} - 6$

4. $f(x) = \frac{3}{4+3x}$

5. $f(x) = \frac{3x^2}{4x^2-4}$

6. $f(x) = \frac{10x^2}{x^2-1}$

For #10-11, find the domain, VA, & HA and graph the function with their asymptotes.

10. $f(x) = \frac{x-3}{2x+5}$

11. $f(x) = \frac{2x-3}{5-3x}$
